

## How EC3-Grade 12 Students Can Log in to Canvas

1. Go to the website <https://canvas.ldi.global/>
2. Click *Student Login*

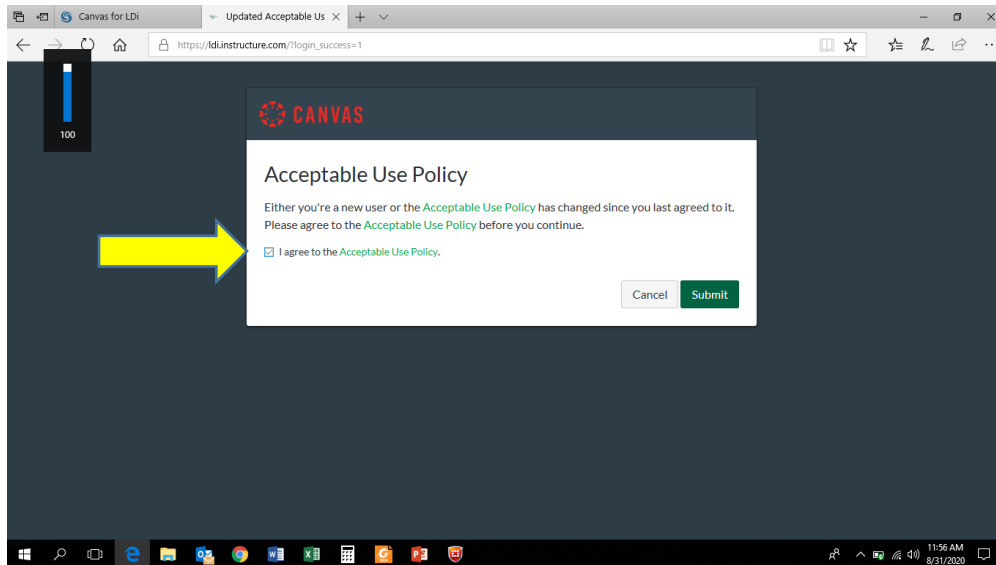

3. This takes you to the Microsoft Office sign-in page.

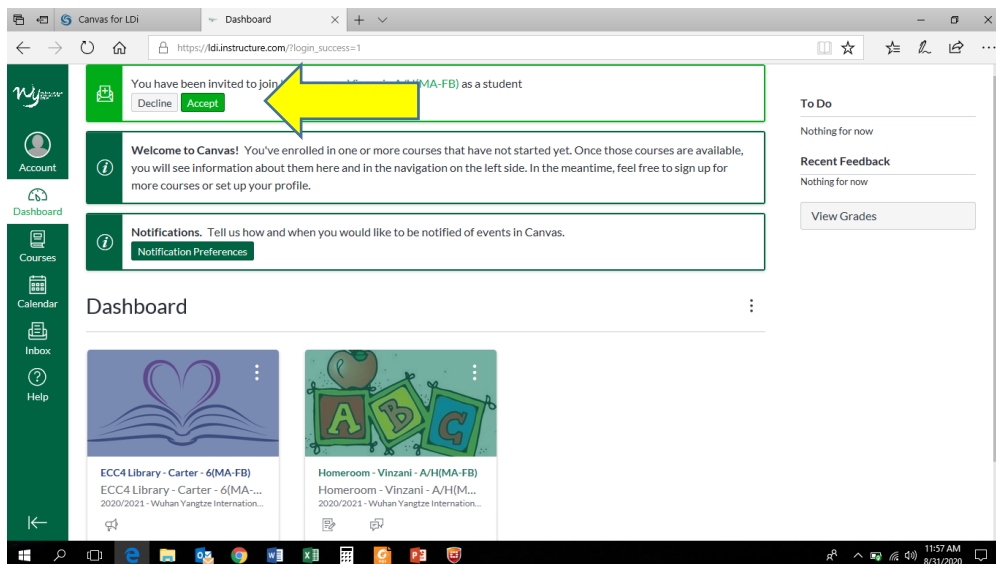

4. TO SIGN IN:
  - a. Email address: The school issued email that was provided.
  - b. Password: The password provided to you by the school.

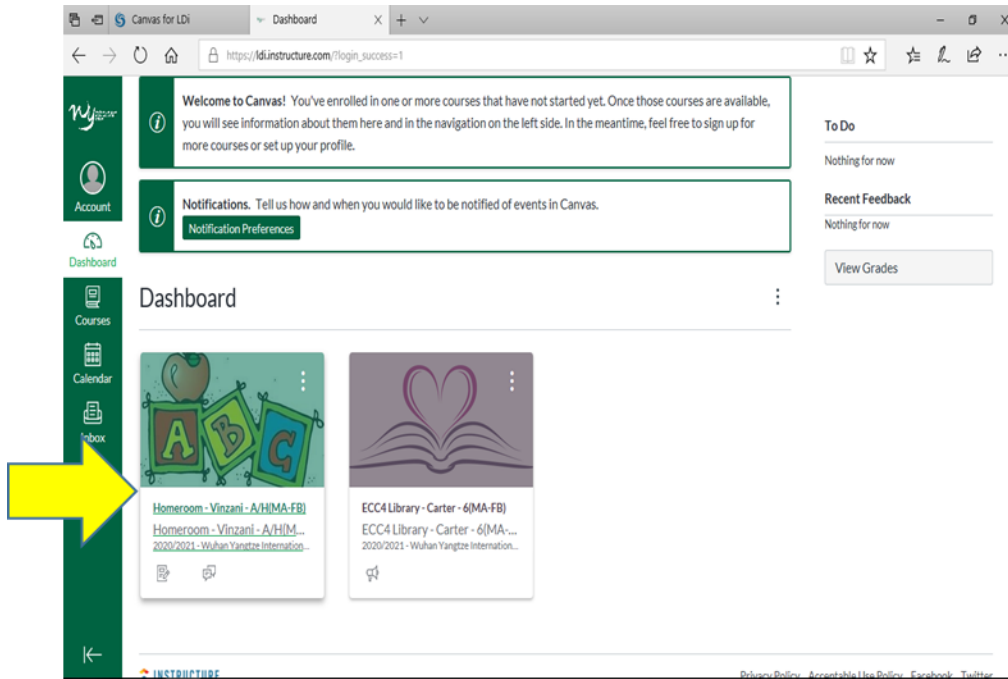

5. Click *I agree to the Acceptable Use Policy* and *Submit*. If you do not agree, you will not be able to log in and access Canvas.

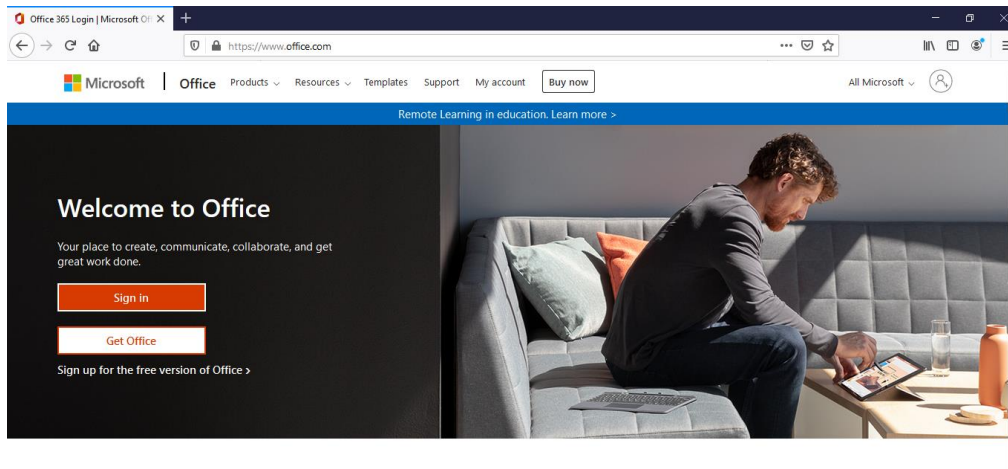

6. The view below is the Dashboard. Click *Accept* to join the teacher's course.

7. After you click *Accept*, you will be connected to your Canvas course and can see and select all the classes you are enrolled in.

8. Once you are logged into your Canvas account, you are also logged into your [www.office.com](https://www.office.com) account.

**NOTE:** If you have a sibling and you are both using the same device for your work, you must sign out of **both** Canvas and [www.office.com](https://www.office.com) after you are finished. If child #2 wants to log in using the same device child #1 used, child #1 must have logged out of **both** Canvas and Office first. Otherwise, child #2 will get an error. Only after one child is logged out of **both** Canvas and Office will the other child be able to log in.

***If you have any issues logging into your account, please contact WYIS Canvas Support: Edgar Franks (edgar.franks@wyischina.com) or June Lei (june.lei@wyischina.com).***
